PROFESSIONAL SUMMARY

Software Developer with 3.8 years of experience designing, implementing, and securing enterprise identity ecosystems. Expert in Okta, Auth0, SAML, SCIM, MFA, and Zero Trust architectures with a strong foundation in full-stack development (React, Node.js). Proven track record delivering large-scale IAM migrations, SSO integrations, identity proofing, and advanced access control in high-security environments. Passionate about building secure, scalable, and automation-driven IAM solutions for global organizations.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js 15, Node.js, Express, Tailwind CSS

Databases & ORM: MongoDB, MySQL, Prisma

Identity & Access Management: Okta, Auth0, SAML, SWA, SCIM, MFA, Zero Trust Security

Cloud & DevOps: AWS S3, CI/CD, Docker, Git, GitHub

Tools: Jira, Postman, Visual Studio Code

EXPERIENCE

ANTHROPIC IDENTITY | CIAM DEVELOPER/SOFTWARE DEVELOPER Kathmandu, Nepal | Jan 2025 – Jun 2025

- Deployed 100+ SSO (Okta) connections, reducing manual workflows by 40% and improving authentication efficiency
- Automated SCIM provisioning for 1000+ users and enforced MFA policies, enhancing security posture
- Authored 40+ IAM guides and templates; resolved sync and access issues, reducing support tickets by 30%
- Created reusable SAML integration templates and access control rules, decreasing implementation time by 25%

BEYONDID | DEVELOPER

Kathmandu, Nepal | Feb 2023 – Sep 2024

- Developed and implemented identity access management solutions using React, Node.js, and MongoDB, improving system security and user authentication processes by 35%
- Verified and resolved over 100 bug reports and issues, ensuring smooth operation of applications and increasing system uptime
- Learned and applied multiple coding languages and development frameworks, such as TypeScript and Express, reducing development time by 15%
- Conducted rigorous root-cause analyses to identify and correct software issues, decreasing recurring problems by 40%
- Utilized Jira and GitHub for project tracking and version control, maintaining error-free code and reducing deployment errors by 25%

BEYONDID | ASSOCIATE SOFTWARE DEVELOPER

Kathmandu, Nepal | Aug 2021 – Feb 2023

- Wrote clean, well-tested code for various projects, reducing software errors by 20% and improving maintainability across codebase
- Verified and resolved over 100 bug reports, enhancing application stability and performance by 25%
- Developed IAM systems with React and Node.js, focusing on SSO, identity proofing, and risk analysis for user applications
- Collaborated with developers to identify and fix software bugs, reducing debugging time by 20% and ensuring timely delivery

KEY PROJECTS

TRAVEL BOOKING PLATFORM – SECURE WEB APPLICATION

JUL 2025 – PRESENT

- Architected a secure travel booking platform using Next.js 14 App Router with server components and TypeScript
- Implemented Okta-based OIDC authentication via NextAuth.js to secure administrative and booking workflows
- Designed and enforced role-based access control (RBAC) across protected routes and server actions

- Integrated Stripe Checkout with webhook-driven reconciliation to manage booking payment lifecycles
- Developed validated server actions for booking and contact flows, ensuring secure data handling
- Modeled scalable application data using Prisma ORM with MongoDB
- Delivered a production-ready deployment with environment-driven configuration and theming

JANAKPUR ART & CRAFT – SECURE E-COMMERCE PLATFORM

JUL 2025 – PRESENT

- Designed and developed a secure e-commerce platform with Okta OIDC authentication using NextAuth.js
- Implemented role-based access control (RBAC) for admin dashboards and protected API endpoints
- Integrated Okta API tokens to support controlled user onboarding and lifecycle management
- Built secure checkout and order management workflows using Stripe Checkout and webhook reconciliation
- Developed administrative tooling for catalog management, fulfilment tracking, and operational auditing
- Architected scalable data models using Prisma ORM with MongoDB for long-term maintainability

CFI GROUP - ENTERPRISE IAM MIGRATION

JAN 2025 – MAR 2025

- Spearheaded migration of enterprise applications to modern identity platforms
- Enhanced security through multi-factor authentication and conditional access policies
- Resolved complex identity synchronization challenges across hybrid environments
- Developed comprehensive technical documentation for identity management processes

LABVIVA - APPLICATION MIGRATION

MAR 2025 – JUN 2025

- Orchestrated enterprise application migrations to cloud-based IAM solutions
- Designed and implemented SSO integrations with zero business disruption
- Established automated user provisioning workflows across legacy and modern systems
- Enhanced security posture through deployment of adaptive authentication policies

SURF INTERNET - IDENTITY MIGRATION

MAR 2025 – JUN 2025

- Led large-scale identity migration for hundreds of applications
- Specialized in SAML and Secure Web Authentication (SWA) integrations
- Designed and executed phased migration strategies for complex application portfolios
- Developed standardized integration templates for SAML/SWA implementations

ZERO TRUST SECURITY SYSTEM

AUG 2021 – 2024

- Developed full-stack application with React frontend and Express.js backend with MongoDB
- Implemented comprehensive identity access management system with CRUD operations
- Built modules for SSO type management, security assessments, and risk factor analysis
- Created reporting dashboard for security metrics and compliance tracking

IPA/ZTA DISCOVERY PLATFORM

Nov 2021 – 2022

- Engineered full-stack solution using React.js, Express.js, and MongoDB
- Implemented user provisioning and deprovisioning workflows
- Developed assessment tools for security compliance evaluation
- Built SSO management interface with risk analysis capabilities

BEYONDID INTEGRATION NETWORK

2022 – 2024

- Researched and developed greenfield application using Next.js 13 and Tailwind CSS
- Implemented Prisma ORM for efficient database operations with MongoDB
- Designed and built model questionnaires for security assessments
- Created risk categorization system for identity management

LEXISNEXIS DEMO PORTAL

2023 – 2024

- Integrated Okta identity platform with LexisNexis Identity Proofing Solutions
- Enhanced customer identity verification processes for various business sizes
- Developed scalable authentication solutions for enterprise clients

- Implemented customizable identity proofing workflows

FINTECH PORTAL WITH ADVANCED IDENTITY VERIFICATION

2023 – 2024

- Developed comprehensive fintech portal using Auth0 for authentication
- Integrated Socure for advanced identity verification capabilities
- Implemented secure user registration with QR code generation for document uploads
- Built transaction processing system with multi-factor authentication
- Added biometric verification for enhanced security

HEALTHCARE PATIENT PORTAL

2023 – 2024

- Developed full-stack patient portal using React frontend and Node.js/Express backend
- Implemented secure access controls for healthcare services
- Integrated Okta and Auth0 for comprehensive identity management
- Ensured HIPAA compliance through proper data protection measures
- Built patient data management system with privacy safeguards

EDUCATION

Maulana Azad National Institute of Technology

Bhopal, India | 2016 – 2020

B.TECH IN ELECTRONICS & COMMUNICATION ENGINEERING

ACHIEVEMENTS

- FY2022 BeyondID Core Value Award - Growth Category

CERTIFICATIONS

- Okta Certified Professional
- Okta Certified Developer
- Okta Certified Administrator
- Okta Certified Consultant
